ROHM Co., Ltd.

Notice of Changes to the Classification Results of Certain Products under the U.S. Export Administration Regulations (EAR)

To Our Valued Customers,

Due to recent situation in Ukraine and the Middle East, the importance of security trade controls has increased, and export regulations are being strengthened in various countries. In response, we recognize the need to reinforce our compliance framework.

Given these circumstances, we have unified our company-wide approach to determining product classification under the U.S. Export Administration Regulations (EAR), which was previously conducted separately by each business division. As a result of this unification, the classification of some products has changed from “Not subject to EAR” to “EAR99.” For details, please refer to our company website.

1. Implementation

We have revised our method for determining product classification under EAR from a division-based approach to a unified company-wide operation. As a general rule, products manufactured using U.S.-origin equipment or software are now uniformly considered subject to EAR.

2. Results of the Classification Review

The classification results for some products have changed from “Not subject to EAR” to “EAR99” (Subject to EAR). You can check the classification results for each product by referring to attached list on the next pages.

3. Contact

If you have any questions or concerns regarding this matter, please contact your ROHM sales representative.

Classification Results of Certain Products under the U.S. EAR
