RPT62-EVK001 User's Guide

The RPT62-EVK001 is a power tree solution reference board developed for infotainment devices such as vehicle clusters and center information displays, as well as for ADAS ECUs. The power system that can support functional safety is integrated on a single board, realizing an optimal configuration as a power tree. Good EMC performance that meets CISPR25 Class 5 even when all power supplies are operating, and reduces heat generation of each device by distributing high-efficiency DCDC. In addition, two voltage monitoring ICs with self-diagnosis functions can monitor the output of all systems and contribute to a higher level of functional safety. This document provides an overview of the RPT62-EVK001 board, the names of each part, and how to use it.

Outline of the board and name of functional blocks

The RPT62-EVK001 board appearance and part names are shown below.

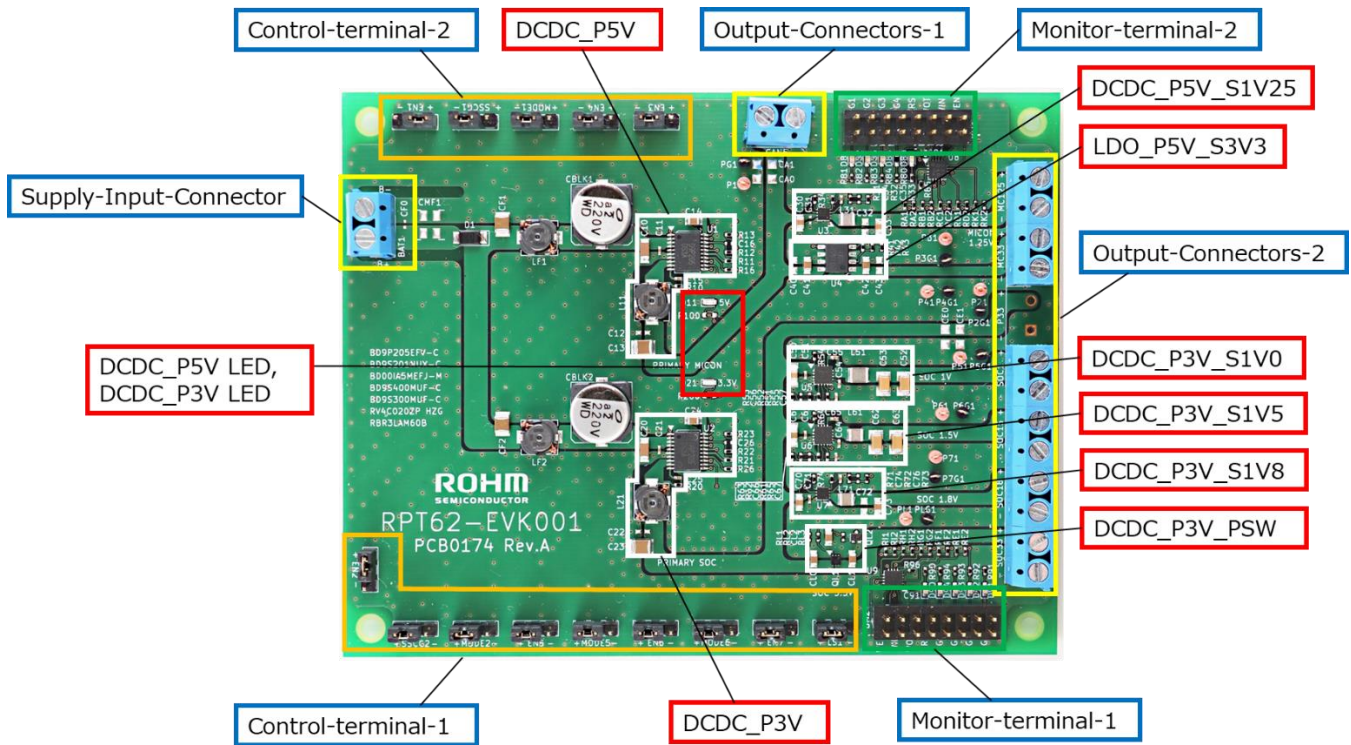

Figure 2 RPT62-EVK external overview and symbol name of board functional blocks

Product name of the board	RPT62-EVK001
Board X, Y dimension	121.9 x 96.5 mm
Layer structure	FR-4 4layer, 1.6mm thickness

Operating method

RPT62-EVK001 can start by following procedure

1. Set the Enable control and Mode control of each power supply IC according to Tables 3 and 4 below. If necessary, connect each Enable terminal to a pin header so that it can be controlled from an external device.
2. Connect the power input to the Supply-Input-Connector, and connect the power supply destination device and device to the Output-Connectors-1 / -2.
3. Turn on power input and start power supply
4. Check that DCDC_P5V (D11 LED) and DCDC_P3V (D21 LED) are on

Power supply monitoring function

The PRT62-EVK001 is equipped with two power supply monitoring ICs, which can monitor the DCDC_P5V system and DCDC_P3V system power trees, respectively. The Power Good signal, XRSTOUT signal, and Watch Dog Timer output from the power supply monitoring IC can be checked with Monitor-terminal-1 / -2. Refer to Table 5 and Table 6 below for the signal arrangement. The output result (PGx, XRSTOUT, WDTOUT) signal of the power monitoring IC can be checked by LED.

Table 5 Monitor-terminal-1 signal assignment

Notes

- 1) The information contained herein is subject to change without notice.
- 2) Before you use our Products, please contact our sales representative and verify the latest specifications :
- 3) Although ROHM is continuously working to improve product reliability and quality, semiconductors can break down and malfunction due to various factors.
Therefore, in order to prevent personal injury or fire arising from failure, please take safety measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures. ROHM shall have no responsibility for any damages arising out of the use of our Products beyond the rating specified by ROHM.
- 4) Examples of application circuits, circuit constants and any other information contained herein are provided only to illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.
- 5) The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM or any other parties. ROHM shall have no responsibility whatsoever for any dispute arising out of the use of such technical information.
- 6) The Products specified in this document are not designed to be radiation tolerant.
- 7) For use of our Products in applications requiring a high degree of reliability (as exemplified below), please contact and consult with a ROHM representative : transportation equipment (i.e. cars, ships, trains), primary communication equipment, traffic lights, fire/crime prevention, safety equipment, medical systems, servers, solar cells, and power transmission systems.
- 8) Do not use our Products in applications requiring extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters.
- 9) ROHM shall have no responsibility for any damages or injury arising from non-compliance with the recommended usage conditions and specifications contained herein.
- 10) ROHM has used reasonable care to ensure the accuracy of the information contained in this document. However, ROHM does not warrants that such information is error-free, and ROHM shall have no responsibility for any damages arising from any inaccuracy or misprint of such information.
- 11) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. For more details, including RoHS compatibility, please contact a ROHM sales office. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 12) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- 13) This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.
